

Questions: Geophysics Session

- **What combination of current and innovative geophysical tools can be used to monitor performance of remedial systems?**
- **How can we optimize both the remedial and the monitoring systems?**
- **How can geophysical tools be better applied to measure progress towards meeting cleanup goals?**
- **What geophysical tools can be used to reduce uncertainties associated with performance monitoring?**
- **How can geophysical tools be integrated with other performance monitoring tools into systems?**
- **Where are current practices in geophysics deficient?**
